### **DETAILED ACTION**

Applicant's proposed modified restriction is not found to be persuasive. The telephone interview did not result in an agreement. The counsel was told that there was no guarantee that the application was not restrictable. Counsel laws told that he could send in his response and it would be considered. The outstanding and reapplied restriction is detailed below. Applicant will be given another 30 days to respond to this office action.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, drawn to a microelectronic assembly, classified in class 257, subclass 778.
  - II. Claims 20-24, drawn to a conductive element, classified in class 29, subclass 18.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require

Art Unit: 2826

the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 16 does not require the type of conductive element defined in claim 20. The subcombination has separate utility such as use in general purpose ball-bonding arrays.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pershelle Greene whose telephone number is 703-305-3870. The examiner can normally be reached on M-F 8:30am - 5:00pm.
